Summary

Software Engineer with over 10 years of professional experience as a Java and Full-Stack Developer. Experienced in a variety of projects requiring continuous learning, rapid adaptation, and collaboration across diverse, cross-functional teams, as well as direct client interaction in both local and international projects.
Passionate about problem-solving by identifying patterns and exploring different perspectives when engaging with clients, with a core focus on helping people succeed.

Professional Experience

Solutis Tecnologias

- **Lead Software Engineer** | *August 2021 – Present (5 years 2 months)* – São Paulo, Brazil

Banco Bradesco (Solutis Consulting)

- **Lead Software Engineer** | *August 2025 – Present (1 year 2 months)*
    - Serving as Technical Lead for front-end and back-end development teams, heading the system migration to the new alphanumeric CNPJ format.
- **Senior Full Stack Engineer** | *September 2023 – August 2025 (2 years)*
    - Worked within Banco Bradesco's Investments division as a Senior Full Stack Engineer on the Investor Profile Analysis team.
    - Maintained the existing legacy monolithic system and developed new features for the Investor Profile Analysis application.
    - Designed and developed RESTful APIs to support the future migration from the monolith to a modern technology stack.
    - Delivered a facelift for the Individual/Qualified Investor Declaration within the mobile application.
- **Solutions Architect** | *May 2023 – September 2023 (5 months)*
    - Solutions Architect at Banco Bradesco's DATI division, responsible for designing solutions for regulatory teams, creating architectural models/diagrams, and presenting them to the committee.

Tribunal de Justiça do Estado da Bahia (Solutis Consulting)

- **Senior Backend Engineer** | *January 2023 – May 2023 (5 months)*
    - Contributed to the legal process consultation system, driving the architecture and development of the authentication API.

Banco Bradesco (Solutis Consulting)

- **Senior Java Software Engineer** | *August 2021 – January 2023 (1 year 6 months)*
    - Worked full-time as a consultant through Solutis, developing backend features for Banco Bradesco's mobile application.
    - Developed microservices leveraging Spring Boot and JAX-RS.
    - Maintained legacy codebases and existing enterprise systems.

TOPdesk

- **Customer Solutions Engineer** | *July 2016 – August 2021 (5 years 2 months)* – São Paulo, Brazil
    - Java Developer within the Customer Solutions division, analyzing, designing, and developing customer-centric solutions. Expanded and customized the software to meet specific enterprise requirements, delivered training, and collaborated directly with local and international clients and peers.
    - Requirement gathering, system analysis, and solution design.
    - Development of core services and APIs.
    - Customizations, automation workflows, and system integrations.
    - Development of internal tools.
    - Worked abroad for 4 months as a member of the Customer Solutions department at TOPdesk Headquarters in the Netherlands, mastering the global codebase and deploying tailored software solutions.
    - Engineered a complete end-to-end, API-driven chat solution for TOPdesk's largest client in Brazil (a prominent financial institution), fully integrated with their ITSM platform and IBM Watson.

T2S Tecnologia

- **Systems Developer** | *April 2014 – May 2015 (1 year 2 months)* – Praia Grande, São Paulo, Brazil
    - Managed software requirements gathering and analysis, built desktop applications using Java Swing, modeled databases using PostgreSQL, and programmatically generated reports using Jasper Reports (iReport), alongside providing client support for deployed applications.
